# **What is Gatling?**

---

# Facts

- Open Source load testing framework
  - Since 2009
  - Written in Scala
  - Active community
  - Support for http, https, WebSockets, JMS
-

# Why should I use Gatling?

---

# Easy to use DSL

```
object BrowseSitemap {  
  
    val sitemapFeeder = sitemap("sitemap.xml").random  
  
    val browse = repeat(10) {  
        feed(sitemapFeeder)  
        .doIf(session => !session("loc").as[String].startsWith("/protected/")) {  
            exec(http("${loc}")  
                .get("""${loc}"""))  
        }  
    }  
}
```

---

# Easy to use DSL

(<http://gatling.io/docs/2.1.5/cheat-sheet.html>)

## Gatling's Cheat sheet

Click on a DSL element to know how to use it and what it does

### Scenario definition Describe your users behaviour

#### Scenario

`scenario`

#### Loops

`forever`

`repeat`

`during`

`asLongAs`

`foreach`

#### Base structures

`exec`

`group`

`pause`

`pace`

`rendezVous`

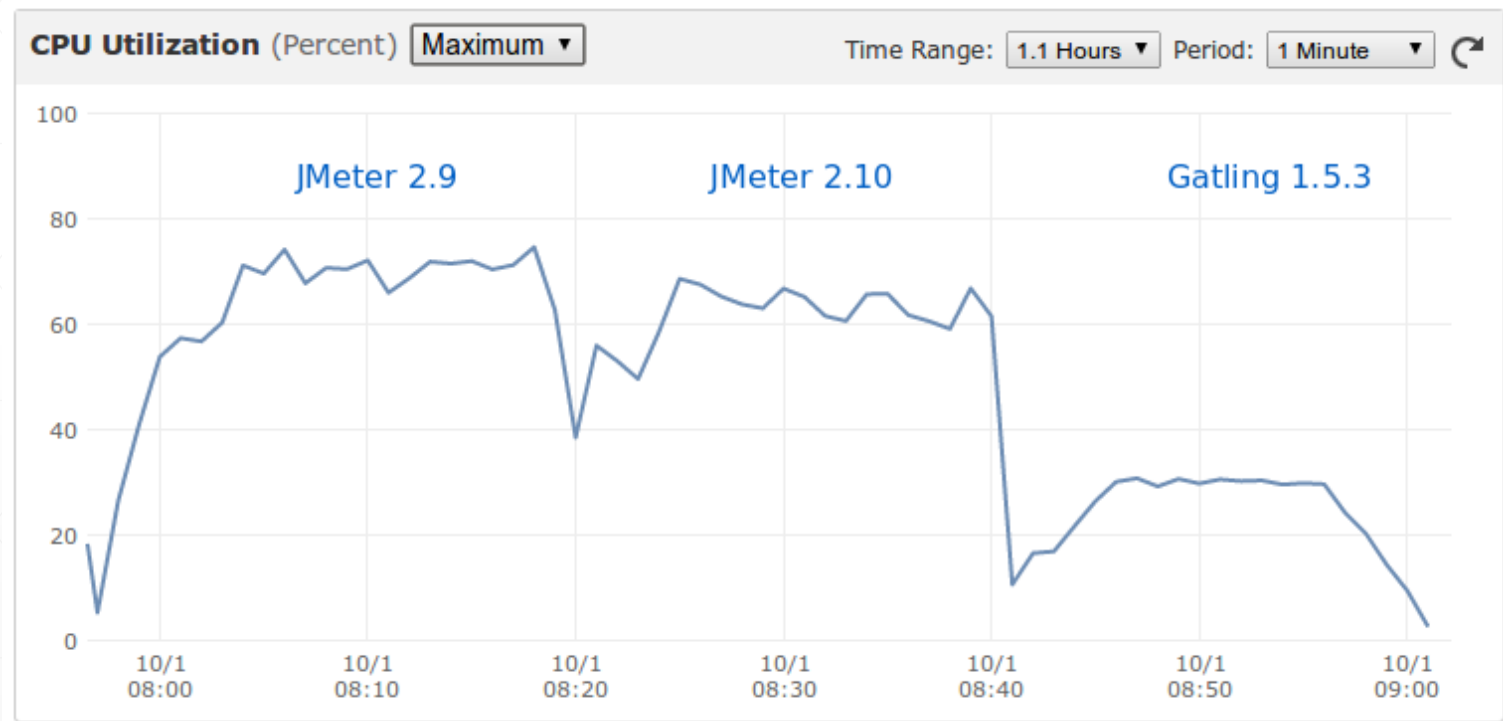

#### Failure handling

`tryMax`

`exitBlockOnFail`

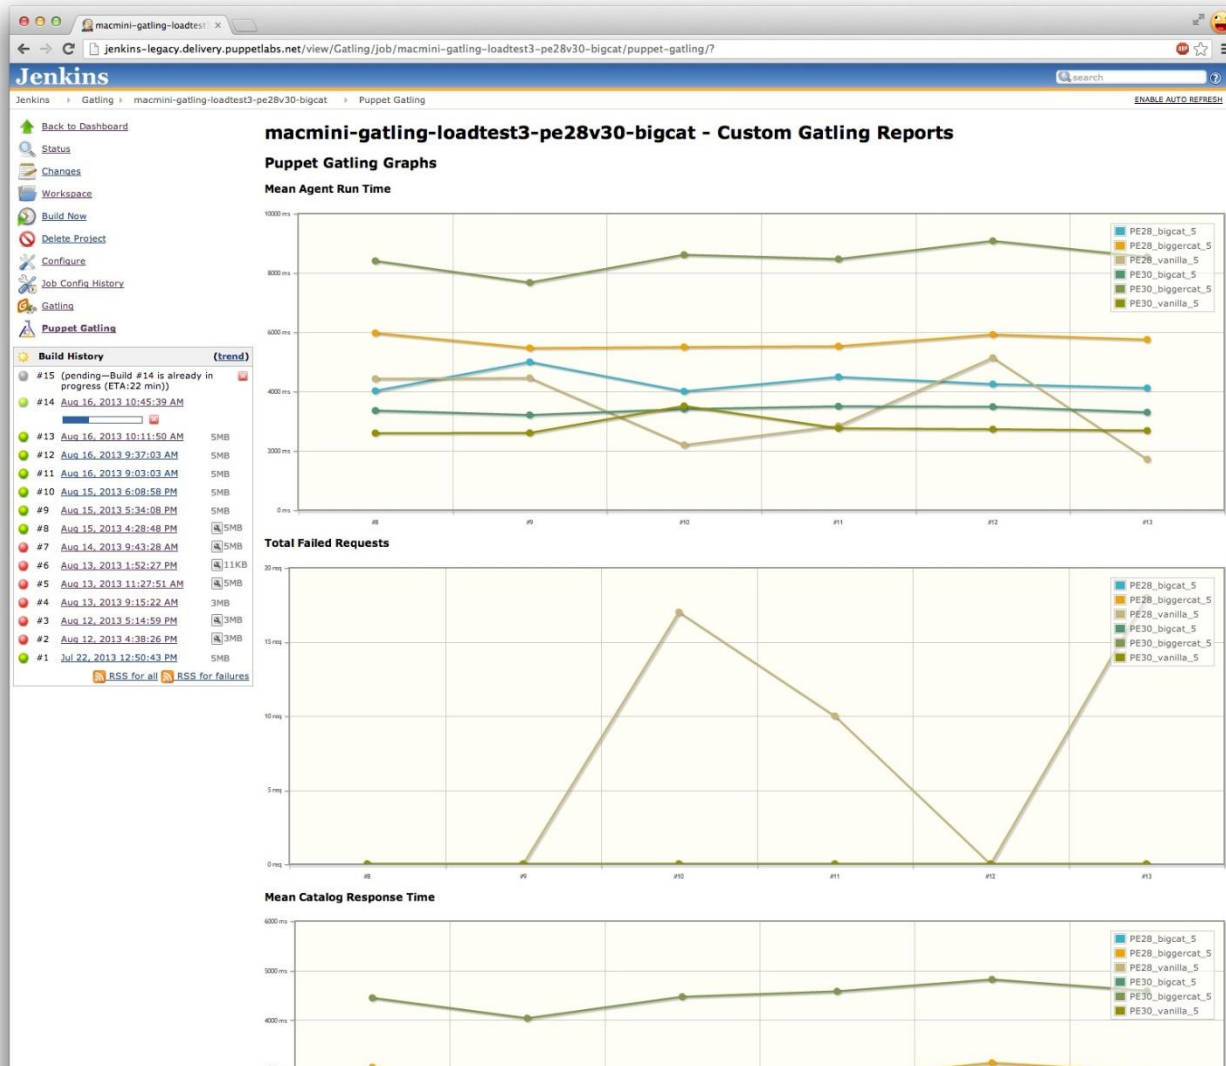

# One thread per user architecture

# Nice and meaningfull reports

# CI integration

# What could be better

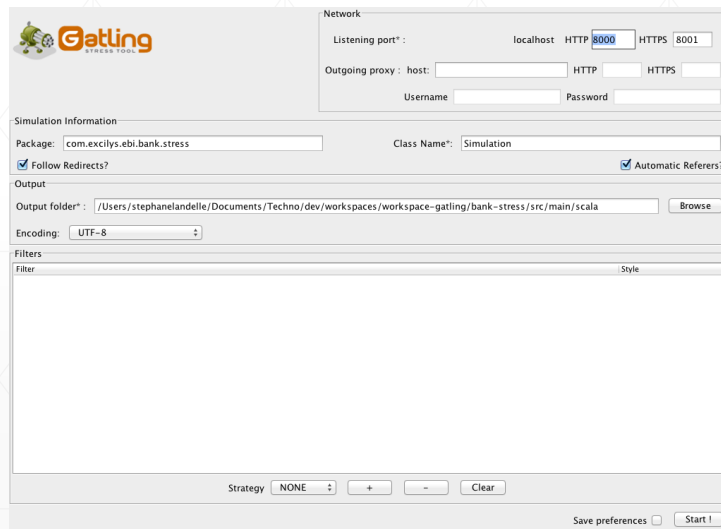

- Support for multiple nodes
  - Support for more protocols
  - Scala language
  - Report with JVM information
-

# **How does it Work?**

---

# Two ways to use Gatling

## GUI Recorder

## Your IDE

```
object BrowseSitemap {  
  
    val sitemapFeeder = sitemap("sitemap")  
  
    val browse = repeat(10) {  
        feed(sitemapFeeder)  
        .doIf(session => !session.get("sitemap"))  
        .exec(http("GET", "sitemap.xml"))  
    }  
  
}
```

# Gatling is not a Browser!

- Not running JavaScript
- Not downloading css resources
- No AJAX support
- Downloading HTML
- All linked resources

# Its just a Simulation

Limited by:

- your bandwidth
  - your OS
  - the resources of your Computer
-

# Demonstration
